NEXT WEEK! U.S. EXPORT CONTROLS ON RUSSIA: LATEST DEVELOPMENTS | March 31 | 10:00 AM - 11:30 AM | Online

In response to Russia's invasion of the Ukraine, the U.S. Government has imposed a sweeping set of export controls on Russia and Belarus. These new controls place significant restrictions on U.S. exports, re-exports, and in-country transfers, and on products manufactured abroad with U.S. technology or equipment. This session will explain the recent changes in the Export Administration Regulations and what they mean for you.

**Thank You For Years of
Fantastic Work**
Kate Kanapeaux

FAREWELL TO A VERY SPECIAL CO-WORKER

Kate Kanapeaux will depart PNDC at the end of March. Kate's outstanding leadership has touched every PNDC member or partner through developing business in the pacific northwest. The PNDC board and staff will miss her expertise in grants, cybersecurity, trade shows and executive leadership. PNDC wishes her the very best and much success in her plans. She will remain in the pacific northwest area. Thank you, Kate!

MEMBER NEWS

AEROSPACE & DEFENSE SUPPLIER SUMMIT | April 11 - 13 | Seattle, WA

Don't forget to secure your spot at this year's Aerospace & Defense Supplier Summit. This event features speakers from Boeing and Choose Washington State with contributions from CTG, Michigan Economic Development Corporation, and CNW Courier Network. This event pulls in 1000 delegates from over 500 companies, so there is no shortage of reasons for those interested in the aerospace industry to attend.

Northwest UAV Teams with Elbit Systems to Debut the NW-44 Multi-Fuel Engine on the Skylark™ 3 Hybrid

Northwest UAV's NW-44 multi-fuel engine increase's reliability and improves endurance in critical mission deployment on the Elbit Systems Skylark 3 Hybrid UAS.

Northwest UAV (NWUAV) is proud to announce a collaborative and long-term effort with Elbit Systems as part of the Skylark 3 Hybrid team. As a result of this team effort, the Elbit Systems Skylark 3, equipped with the proven Northwest UAV NW-44 Multi-Fuel Engine, was presented for the first time at the Singapore Airshow last month. The Skylark 3 Small Tactical Unmanned Aerial Systems (STUAS) is equipped with a hybrid propulsion system consisting of both an electric motor and the NW-44 multi-fuel internal combustion engine. This combination triples the aircraft's endurance and offers up to 18 hours of operations, with no impact on the size or weight, significantly increasing mission effectiveness and cost-efficiency.

The Skylark 3 Hybrid leverages the NW-44 to fly rapidly to the Area of Interest (AOI) and switches to the electrical engine while operating above the AOI. The twin-engine architecture and proven reliability of incorporating the NW-44 into the new Skylark enables one power source to back up the other, providing the dependability and redundancy that delivers a level of safety expected in this specialized field.

THIS WEEK'S SUSTAINING MEMBER SPOTLIGHT:
