

URGENT ANNOUNCEMENT

The Department of Defense is exploring options which would accelerate production and build more capacity across the industrial base for weapons and equipment that can be rapidly exported, deployed with minimal training, and that are proven effective in the battlefield.

The Department of Defense seeks information from across industry on weapons systems or other commercial capabilities related to air defense, anti-armor, anti-personnel, coastal defense, counter battery, unmanned aerial systems, and communications (e.g., secure radios, satellite internet).
